

# BRICOFIX WALLPAPER

DATA SHEET  
06/2019

## DESCRIPTION:

Adhesive based on cellulosic derivatives.

## APPLICATIONS:

Preparation of surfaces before attaching paper. Especially suitable for positioning and pasting wallpaper.

## INSTRUCTIONS:

Pour the powder on cold water stirring continuously while adding all the powder. Then let stand for a minimum of 15 minutes and stir the mixture again, thus leaving the product ready for use.

Dosage is carried out according to the following table:

USE	DOSAGE	POUR ONE BAG IN
Strong papers...	1:40	5 litres of water
Medium papers	1:50	6 ¼ l. water
Fine papers	1:60	7 ½ l. water
Preparation of walls	1:70	8 ¾ l. water

The adhesive is applied with a brush or roller on the back of the paper to be bonded. Leave for a while to permit thorough moistening.

Then, place the paper strip on the wall, which has to be clean, dry and perfectly prepared.

With the aid of a sponge or brush smooth out the surface, eliminating air bubbles by even pressure applied from the centre to the borders of the paper.

In the joints, it is recommended to press with a rubber roller.

Due to its composition the adhesive is protected from mold and putrefaction.

## STORAGE:

At least 3 years in its original sealed packages.

## PRESENTATION:

Boxes 125 g

## TECHNICAL FEATURES:

Appearance: Fine white granules.

Viscosity: Brookfield RVT. Spindle 4 to 20 rpm  
2% water solution at 23°C.  
15.000 ± 5.000 cps.

Solution: Transparent.

## CLEANING:

The cleaning of the tools must be made with water immediately after using.

## HEALTH & SAFETY:

According to current legislation, this product is free of risks and requires no special safety measure when manipulating or storing.
